Maheen Hamid

AI Engineer | Generative AI | RAG | Agentic AI

Sialkot, Pakistan | +92 331 1432480 | maheen.hamid30@gmail.com

Portfolio | GitHub | LinkedIn

Professional Summary

Computer Science graduate focused on AI Engineering and Generative AI, with hands-on experience developing Retrieval-Augmented Generation (RAG) systems, LLM evaluation pipelines, agentic AI workflows, and backend APIs. Currently developing RepoIQ, a GitHub-integrated repository analysis platform. Skilled in Python, FastAPI, LangGraph, PostgreSQL, and vector databases, with a focus on building reliable, scalable AI applications.

Technical Skills

Programming Languages: Python, JavaScript (ES6+), TypeScript, SQL, C#
AI & LLM Engineering: Generative AI, Retrieval-Augmented Generation (RAG), LangGraph, LangChain, Agentic Workflows, Prompt Engineering, Embeddings, Reranking
Retrieval & Evaluation: Semantic Search, BM25, Hybrid Retrieval, Precision@K, Recall@K, MRR, Faithfulness Evaluation, Hallucination Analysis
Machine Learning: PyTorch, scikit-learn, Hugging Face, Sentence Transformers
Frameworks & APIs: FastAPI, ASP.NET Core, REST APIs, React, Next.js
Databases & DevOps: PostgreSQL, Qdrant, Redis, Docker, Git, GitHub Actions

Projects

Ragify — RAG Evaluation & Optimization Platform Oct 2026 – Present
Python, FastAPI, React, PostgreSQL, Qdrant, Docker, Groq | GitHub

- Built a full-stack RAG evaluation platform benchmarking semantic, BM25, and hybrid retrieval using Precision@K, Recall@K, and MRR.
- Integrated LLM-based evaluation for faithfulness, relevance, correctness, and hallucination detection, with experiment reporting and configuration recommendations.

RepoIQ — AI-Powered Repository Analysis Platform (Under Development) Oct 2026 – Present
Python, FastAPI, Next.js, TypeScript, PostgreSQL, GitHub API | GitHub

- Building an AI-powered repository analysis and technical interview platform with context-aware code understanding.
- Integrated GitHub API for repository metadata extraction and source-file filtering; developing embedding-based retrieval.

WukalaGPT — AI-Powered Legal Assistance Platform (Final Year Project) 2025 – 2026
FastAPI, LangGraph, Qdrant, ASP.NET Core, React | **Grade: A+** | Live Demo

- Built a full-stack legal AI platform featuring multi-agent RAG, bilingual assistance, and lawyer discovery.

Education

University of Sialkot Sialkot, Pakistan
Bachelor of Science in Computer Science Sep 2022 – Sep 2026
CGPA: 3.78/4.00
Relevant Coursework (A+ in all): Artificial Intelligence, Machine Learning, Natural Language Processing, Data Structures & Algorithms

Awards & Leadership

Certificate of Appreciation — Department of Computer Science 2026
Awarded by the University of Sialkot for achieving a **4.00/4.00 GPA** in the 7th semester.

Project Lead — University Entrepreneurship Project
Led a team of approximately 15–20 students, coordinating task delegation, team responsibilities, and project operations.
